

THE GROVE SPA

& BOUTIQUE

Tetra Pro CoolPeel & Advanced CO₂ Pre-Treatment

Please review and follow our pre-treatment care plan. Failure to do so could result in the cancellation of your treatment and forfeiture of your deposit.

4 Weeks Before:

- Avoid sun exposure. Recently tanned skin cannot be treated. If your skin is tanned, you may develop hypopigmentation (white spots), which may not clear for 2-3 months or more

2 Weeks Before:

- The use of self-tanning skin care products must be discontinued 2 weeks before treatment
- Any residual self-tanner must be removed prior to treatment

1 Week Before:

- No aspirin
- If you have a history of cold sores, please be sure to pre-treat with an antiviral medication

On the Day of Your Treatment:

- Drink plenty of water prior to treatment
- Shave the area to be treated

Contraindications:

- Pregnant or nursing
- Accutane within the last six months
- Tattoos in the area of treatment
- Photosensitivity or light-triggered seizures
- Photosensitizing medications
- Active skin infections
- Keloid scarring
- Implanted medical devices such as pacemakers, cardioverters

Clients taking daily anticoagulation therapy, iron supplements, and herbal supplements such as ginkgo, ginseng, or garlic may experience bruising in the treatment area.
